# Rules for uses soft from mql5 market

1. You must understand that strictly prohibited enter in your account on mql5 from terminals MT4 or MT5

You must know if from mql5 will see that different people enter on their servers from one vps (after modify it will be 1 server to all no mean which provider do you use) then it's shared public and will ban all account or which has been purchased soft from mql5 and after ban we can't receive updates and activate new ea on this server. We need know as long our server will be is hidden from mql5 (no one enter on mql5) as long we can activate new ea's and receive updates.

📌 If our vps will be blocked then we can use old experts and indicators but we will can't purchase and activate new. It means we will need create new «clean vps». **Please be responsible and follow this simple rules.** ⚡

You must remember that strictly prohibited enter in your account on mql5 from terminals MT4 or MT5 and from browsers on website. It means:

- you can't activate free soft (ea/indicator/utility) in case our vps can be blocked

- you can't subscribe on signals from traders on this vps

- you can't buy any soft from mql5 on this vps and activate it only on your new vps

📌 If you need activate new free soft (ea/indicator/utility) then write to admin he will activate it and send to you. If you will do it on your account then our vps will be blocked + our and your accounts on mql5 with purchased goods.

The one of our friends has lost more then 4000 eur on accounts because by negligence enter in his account mql5 from vps B mql5 has banned him with his money which he received for his signal and works. These are the consequences of such imprudence.

As longer this rules be respected then more time our vps will be alive and we can activate new ea's and have the more soft and the more we can use it all to our advantage
