HOW TO STOP AUTO UPDATE

1. Allow your windows to show hidden files that's if you didn't do it already. To do that go to the search bar on you pc. For windows 7, just click the windows button and search hidden. For windows 8 through to 11, locate the search bar at the down and type hidden
2. Select **"Show hidden files"** settings and click. Look at screenshot bellow
3. Click show settings on windows 10 but on 7, it should come instantly
4. You will be provided with the settings. Select show **hidden files and folders.** Screenshot below
5. Now go to your local disk C: then click on **Users**
6. Now select the **user.** After that, go to **AppData** folder. After that, select **Roaming.** Select **MetaQuotes** folder.
7. Create a ***text*** file there. Then delete the whole ***WebInstall*** folder. Then remove the .txt extension from the text file you created

8. Reach out to me by clicking on this LINK or use this https://t.me/sparrowfxx
